

# Enchanted Forest Decoding Game

Level 5

Make your own Enchanted Forest game and see who can collect the most toadstools.

To be played in small groups - up to 3 children (preferably of similar ability).

## Adult Guidance

1. Cut out and assemble the pine trees.
2. Cut out and laminate the toadstools.
3. Hide a toadstool underneath each tree.
4. Each child takes it in turns to pick a tree.
5. If they can correctly read the word hidden underneath that tree, they get to keep the toadstool and the tree is removed.
6. If they cannot, the toadstool gets re-hidden (try to move it to a different place).
7. When all the toadstool words have been correctly read, the child with the most toadstools wins the game.

## Challenge

Look at all the toadstool **i\_e** words. Can your children match up any **i\_e** words that rhyme? Encourage them to say the words out loud to help!
