

Feed the Dolphins

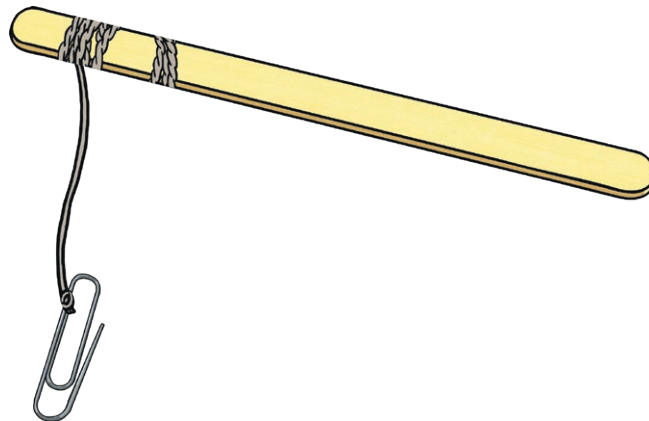

Level 5

Adult Guidance

To make the fish word cards, print the fish out and cut each one out. Stick a paperclip standing up vertically on to the back of each fish using sticky tack, so that the word is facing down.

To make the fishing rods, tie a length of string onto the top of a straw or lolly stick. Tie a paperclip onto the other end of the string and pull the paperclip open slightly to make a hook.

Cut out the dolphins and give one to each player. The children must hook a fish and accurately read the word that is on it to be able to feed the dolphin. If their partner/group feel that they haven't read the word accurately, then they must put the fish back in the 'bucket'. The winner is the person who has fed their dolphin the most fish by the end of the game.
